

Welcome to Viola Fostering Services

Viola Fostering Services is set up as an independent fostering agency, providing high quality foster placements for children and young people in the care of local authorities.

There is a shortage of good foster carers across the country and our aim is to recruit, train and support individuals and families that are interested in caring for children and young people who are unable to stay within their own family settings for various reasons. As an organisation, we strive to provide the best quality support to our foster carers so they can, in turn, provide the best quality care needed for young people in their care.

So if you have experience of working with children and young people and can provide a family environment? We would be interested in hearing from you. We are looking for people who have empathy, resilience and a commitment to making a difference to a child/young person's life. You will need to have a spare room.

We offer very competitive payments to help you do the best for the child and reward you for your hard work. Our rates vary from placement to placement according to the age of the child or young person and their level of needs.
